

THE ENVIRONMENTAL POLICY

THE ENVIRONMENTAL POLICY

Mission Statement

UBC Chemical is committed to protecting the environment, the health and safety of our employees, and the community in which we conduct our business. It is our policy to seek continual improvement throughout our business operations to lessen our impact on the local and global environment by conserving energy, water and other natural resources; reducing waste generation; recycling and; reducing our use of toxic materials. We are committed to environmental excellence and pollution prevention, meeting or exceeding all environmental regulatory requirements.

As a producer we are committed towards continuous improvement and minimization of our environmental impacts by planning and optimization of our production facilities as well as we integrate environmental considerations in our innovation and product development processes to the benefit of our business, customers, consumers and the environment.

We continuously focus on initiating projects to reduce and optimize our consumption of resources to a minimum for our energy-intensive production processes. Our five-year environmental plan contains below objectives;

- We plan to implement use of renewable energy sources such as solar panels, rainwater harvesting system in our solutions to reduce our CO2 emissions.
- Harnessing solar energy to produce our own electricity to power our production plant.
- Reducing the usage of clean water with the help of rainwater harvesting system
- Replacing our company cars with Hybrid or Electric version where applicable
- Improving production efficiency and capacity in our new production facility by replacing existing equipment with higher energy saving reactors to optimize our usage of natural resources

As a distributor, our job is to ensure that products and services purchased or contracted for conform to the goals of our company's environmental policy. We will strive, where feasible, to purchase environmentally preferable products and services to meet the company's office and operational needs. We will also favour suppliers who strive to improve their environmental performance, provide environmentally preferable products, and who can document the supply chain impacts of their efforts.

Wherever possible, purchasing decisions will favour products that:

- Reduce greenhouse gas emissions.
- Are made with renewable energy.
- Reduce pollution from all discharges (releases to air, water, and land).
- Reduce the use of toxic materials hazardous to the environment, employees and public health.
- Reduce packaging and other waste.

THE ENVIRONMENTAL POLICY

- Are energy efficient.

UBC Chemical's Directors have overall responsibility for all aspects of the environmental policy at work within the business.

Confirmed by UBC Chemical:

Burak Erenođlu

CEO,

A handwritten signature in blue ink, written over a horizontal line. The signature is stylized and appears to be 'Burak Erenođlu'.
